

SPEED-DUALLINE FC XFP / SFP+

Dual 2/4/8G FC SFP+ / XFP transponder

WAVELENGTH DIVISION MULTIPLEXING

1

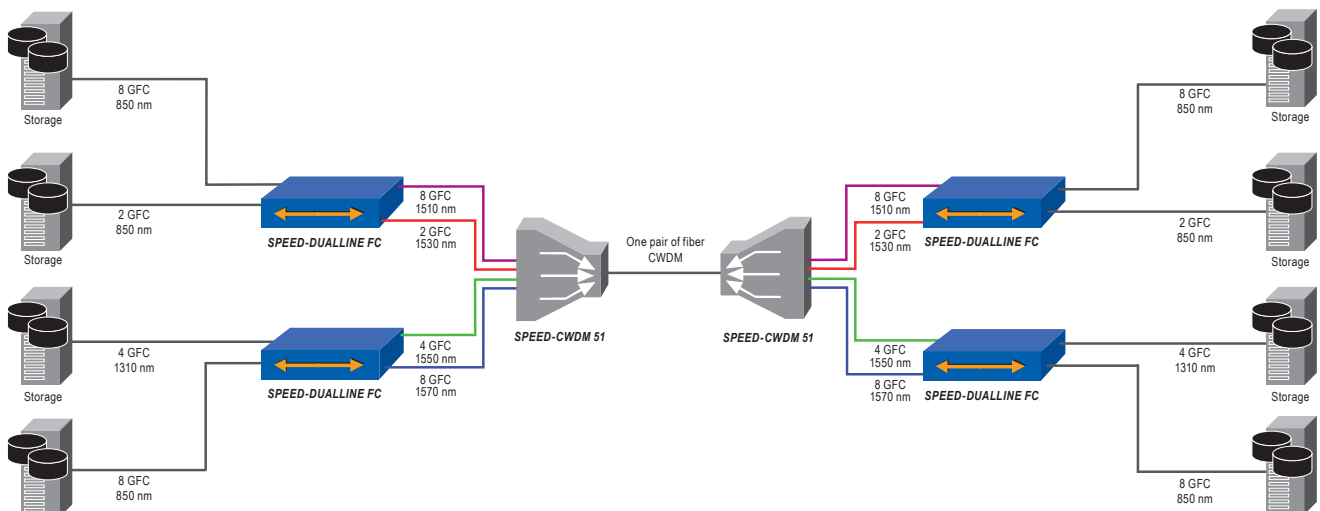

Compact Fibre Channel Transponder supporting 3R, Cross Connect and Protection

- » Fibre Channel demarcation functionality
- » 2/4/8 Gigabit Fibre Channel
- » SFP+ / XFP transponder module
- » CWDM and DWDM support
- » Brocade certified

Data Center Coupling with 2/4/8 GFC over CWDM and DWDM Wavelengths

The SPEED-DUALLINE 10G module is designed as an flexible and high data rate transponder. Depending on customer's requirement this module offers both, four SFP+ ports or alternatively two SFP+ to

two XFP ports. The SPEED-DUALLINE 10G converts two independent 2/4/8 Gbps FC signals into a corresponding wavelength in CWDM and DWDM network infrastructures. In addition the integrated

3R functionality enables to accomplish a transmission of long distances up to 80km.

Specifications

General

- LED Display: unit status, optical link, local loops
- Dimensions (H x W x D): 21 x 131 x 190 mm
- Power supply via backplane

SFP+ ports

- 1+1 protection, SFP or SFP+
- Protocol: Fibre Channel
- Data rate: 2/4/8 Gbps FC
- Link-Loss-Carry-Forward: shutdown of client-SFPs in the event of line SFP signal loss

XFP ports

- Protocol: Fibre Channel
- Data rate: 4 Gbps FC or 8 Gbps FC
- Link-Loss-Carry-Forward: shutdown of client-XFPs in the event of line xFP signal loss

Management

- Integrated SNMP agent, Telnet, alarm notification via SNMP-Trap
- Possible loop on SFP ports
- Transceiver management information provided by integrated DMI functions: input/output power, wavelength, bit rate, status, supported protocols, temperature
- Optional SNMP and web management via SPEED-NMS OE

Housing types

- 4-slot SPEED-CARRIER 1U
- 16-slot SPEED-CARRIER 5U

Ordering options

- SDLFC-2XFP-2SFP-A: SPEED-DUALLINE FC XFP
- SDLFC-2SFP-2SFP-A: SPEED-DUALLINE FC SFP+
